

MAGNETIC RULER

for the Dynamic Cone Penetrometer (DCP)

The Magnetic Ruler is a battery-operated (6 ea AAA), data-collection device for the 8 kg Dynamic Cone Penetrometer (DCP). It displays depth, blows, mm/blow, cumulative mm/blow, and cumulative blow/inch in SI and English. The correlations are provided to CBR (California Bearing Ratio) in % and bearing capacity in kips per square foot. A flash drive records the data, information entered by the operator, and date and time for each test via a waterproof USB port.

KESSLER MR 100

MAGNETIC RULER WITH THE DCP (Dynamic Cone Penetrometer)

MR100 Magnetic Ruler

Parts:

- MR100.500 Vertical scale and control box
- MR100.530 Upper attachment with magnet

The sensitive electronics on the vertical scale detect the position of the upper attachment, which slides freely over the vertical scale and is fastened to the drive rod at the other end. The accuracy of this product is 1 mm.

Retail Price: \$2,750.00
